

Arrive Utah and Circles Policy Priorities

We want all Utah families to thrive, not just survive.

1. We encourage public and private assistance (including cash and in-kind benefits) to help individuals move toward economic stability through a gradual reduction of assistance.
2. We advocate for financial policies, including tax and fee structures, which are not disproportionately burdensome on vulnerable populations, especially populations with low incomes.
3. We support efforts that create quick and identifiable pathways for individuals to secure living wage jobs in all Utah communities.
4. We want all Utahns to have access to safe, adequate, and affordable housing (not paying more than 30% of their income on housing). We value planning which safeguards future affordable housing and creates diverse communities.
5. We join concerted efforts to protect vulnerable populations throughout Utah communities from predatory and unfair practices.
6. We want to ensure all Utahns have access to high-quality and affordable health care.
